

Subcontractor KSL's major work scope will be assumed by the Laboratory by the end of December 2008, when its contract expires. Most KSL personnel are expected to be offered LANS employment in the transition. The Lab began transferring KSL tasks to LANL in April 2007, including the management of excess and salvage operations, for which revenues have increased 55 percent over last year.

LANL to assume work from
subcontractor KSL
